Campus security: Safer learning powered by the cloud

Avigilon Alta for K-12 schools

The challenge on campus

K-12 schools must balance the need for safer learning environments with the urgent realities of rising security challenges, operational demands and limited resources. For example, in 2021-2022 alone, U.S. public schools reported over 857,000 violent incidents, a notable increase from previous years.¹ Proactive physical security measures are no longer negotiable, they are critical for the safety of students, staff, parents and visitors.

¹ National Center for Education Statistics, 2024.

Why Avigilon Alta for K-12 schools

School resource officers (SROs) and faculty can build safer spaces with Avigilon Alta. This cloud-native physical security suite is easy to deploy, scalable and ready to safeguard every corner of campus.

Focus on safety, not drawn-out deployments

From classrooms to sports fields, campus safety starts with fast, flexible solutions. Alta makes it easy with simple software setup, quick hardware installations and adaptable mounting options to protect your campus inside and out.

Achieve 24/7 visibility and take action from anywhere

Know what's happening across campus and respond any time, anywhere. Alta combines video security, access control, smart sensors and more in one dashboard that you can manage from both desktop and mobile.

Detect and respond faster with real-time intelligence

Stay ahead of critical events with intelligence built into every Alta solution. Instantly spot unusual activity, unauthorized access, air quality issues and more. Quickly search for suspicious individuals or vehicles, or activate a lockdown during emergencies.

Streamline campus operations

Smarter security systems do more than protect; they streamline operations, too. Alta offers a comprehensive technology suite for schools, with solutions to screen visitors more efficiently and streamline package deliveries.

Leverage existing technologies with Alta

Protect your current hardware investments and extend system capabilities by integrating third-party cameras, wireless locks, sensors, software and more with Alta. Alta's open APIs bring unlimited integration possibilities.

We have peace of mind that the facility is always secure, while providing easy access for staff. That's the beauty of the cloud.

- Anh Luong,
CISO at One
of the Kids

Alta solutions for school safety

Control who gets in and keep threats out

Protecting your school starts at the front door. Instantly check visitors against blocklists to prevent unauthorized access. AI-enabled cameras enhance safety by monitoring all entry points, while access readers and video intercoms at staff-only entrances and delivery doors help ensure only the right people get in. Secure your facility with confidence.

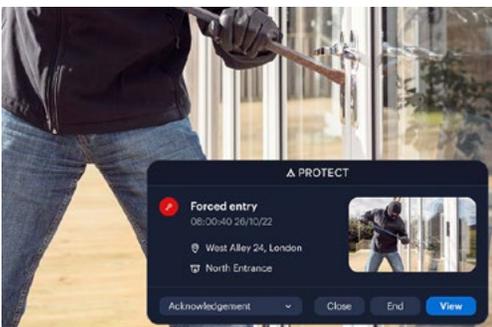

Secure classrooms instantly during a lockdown

During urgent situations, every second matters. Wireless locks help secure classrooms and learning spaces – no keys, no manual steps, no delays. Activate a lockdown from desktop or mobile to secure interior doors and help keep students and staff safe. Integrated video and access control means SROs and administrators get real-time visibility into door status and movement throughout the building.

Enhance visibility and reduce blind spots across campus

Stay on top of what's happening in hallways, cafeterias, playgrounds and more with a scalable and easy-to-use video security system. Integrate AI-powered cameras and sensors to extend situational awareness, so staff can act on incidents early and have the complete picture during investigations such as bullying, fighting, vaping or vandalism on school grounds. With full visibility and real-time alerts, staff can quickly assess incidents, intervene faster and respond decisively.

Strengthen your perimeter and stop threats early

From parking lots to back gates, combine intelligent video, access control and professional monitoring to secure the entire campus perimeter. Detect and alert in real-time on anomalies, loitering and even individuals and vehicles on blocklists. Create custom door schedules to restrict access during school and after hours. Opt for professional monitoring* to get around-the-clock protection. Trained experts can verify alarms using video, such as trespassing, and dispatch first responders before it escalates.

**Available in U.S., Canada, U.K., Ireland, Australia, New Zealand only*

Alta solutions for school safety

Extend awareness to privacy-sensitive areas

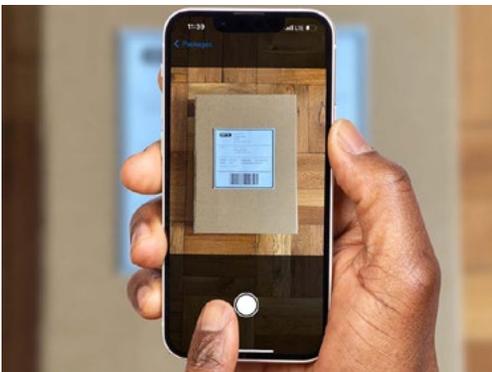

Washrooms, locker rooms and other camera-free areas can present security challenges. Deploy smart sensors to detect vaping, gunshots, loud disturbances and poor air quality issues and notify staff the moment something is wrong. These alerts are automatically linked to nearby video feeds, providing staff with additional context for immediate action.

Accelerate emergency response for safer outcomes

Be prepared for critical incidents with an emergency alerting and response system* that enables staff and students to quickly request help and initiate lockdowns at the push of a button. Mobile panic buttons, wall-mounted triggers, two-way communication and video provide responders with real-time context – giving students and staff a lifeline, and your school the tools to act swiftly and effectively in high-stakes situations.

**Available in U.S. only.*

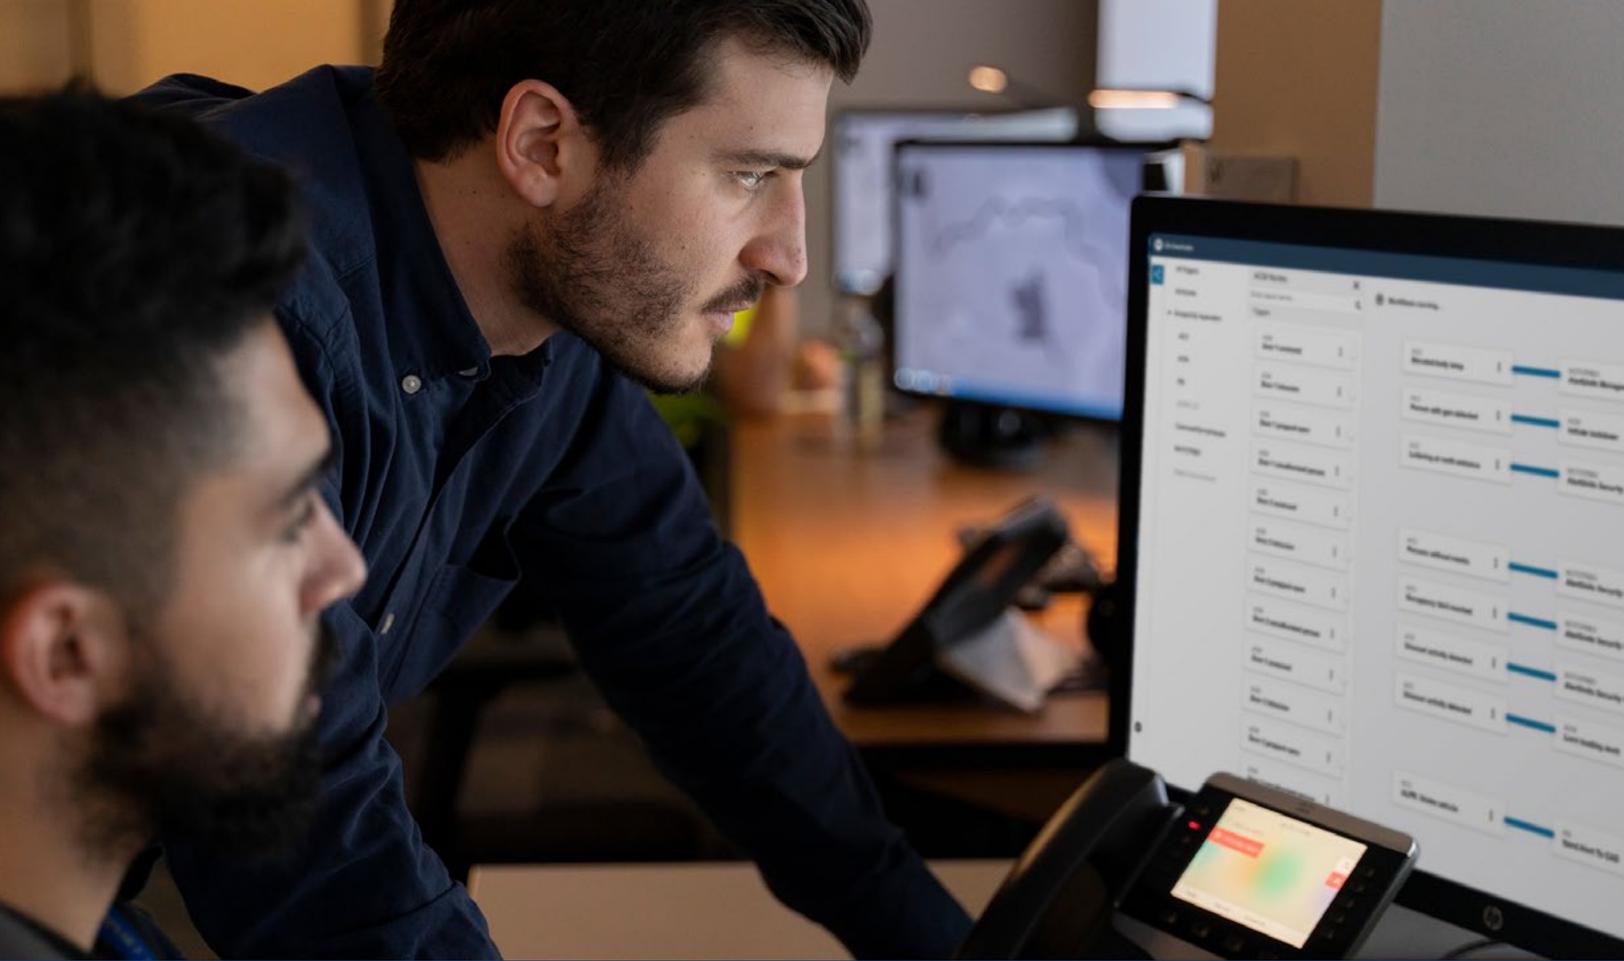

Ensure smooth day-to-day school operations

With a single platform that ties together video, access, and visitor and mailroom management, front office staff can spend less time on manual tasks and more time supporting students. From streamlining package deliveries to visitors, everything is logged, searchable and easy to manage, helping your team maintain a secure and organized campus environment.

Part of something bigger

Your school's security technologies should work together, not in silos. That's why Alta integrates with the broader Motorola Solutions safety technology ecosystem through Orchestrate, a user-friendly automation tool at no additional cost. It's the only ecosystem that integrates video, access control, voice, data and more to offer seamless workflow automations that improve processes, speed up response times and enhance security.
